VOLUME 33 NO. 1–3 SPECIAL ISSUE

GEOCHEMICAL EXPLORATION IN CHINA

Compilation of recent geochemical exploration work carried out in China by Chinese scientists. The majority of the papers were presented at the Third Chinese Exploration Geochemistry Symposium held in Guilin, Guangsu, September 10–15, 1986.

CONTENTS

Foreword — Xie Xuejing vii
Introduction — E.M. Cameron ..... viii/ix

Regional geochemical exploration
Regional Geochemistry — National Reconnaissance Project in China
Xie Xuejing, Sun Huanzhen and Ren Tianxiang 1
Regional geochemical surveys in arid and semiarid regions in the middle and western part of Inner Mongolia
Ren Tianxiang, Zhao Yun, Zhang Hua and Yang Shaoping 11
Geochemical exploration in the semiarid steppe terrain of eastern Inner Mongolia — a case history
Li Qing, Xi Xiaohuan, Ren Tianxiang, Zhao Yutao and Che Guangjun 27
A geochemical well-water survey in arid and semiarid desert regions
Ren Tianxiang, Jiang Ruijin, Guo Lijun, Zhang Hua and Yang Shaoping 47
Regional geochemical exploration in karst regions — a preliminary study
Huang Chengzhi 61

Semiregional and local geochemical exploration
Distribution of trace Hg and its mode of occurrence over Fankou Pb-Zn deposit, Guangdong, China
Zhang Chengliang, Wang Liying, Dong Yong and Peng Shengfeng 73
A model of the primary halo and the geochemical mechanism of halo-ore-forming processes over a strata-bound Pb-Zn-FeS_2 deposit
Zhao Lunshan, Liu Wenhua, Shen Yongli and Zhan Weiguo 85

Electrogeochemical extraction technique in the prospecting of buried gold deposits
Xu Bangliang, Fei Xiquan and Wang Heping 99
Geochemical zoning pattern of the Yinyan tin deposit
Huang Xunde and Zhang Dingyuan 109
Fluid inclusion geochemistry in minerals obtained from Zhao-Ye gold metallogenetic belt, Shandong Province
He Zhili, Yuan Huaiyu and Xu Jiuhua 121
Geochemical exploration for deeply hidden ore in southeastern Hubei Province
Zhou Yate 135
A case history of finding ore deposits by mercury gas survey
Chang Fengchi and Hu Guolian 145
Geochemical exploration in thick transported overburden, Eastern China
Jin Jun, Hu Zhengqing, Sun Xiangli, Zhang Maozhong and Zhang Meidi 155

Other applications of geochemical exploration
Application of geochemical methods in the search for geothermal fields
Zhu Bingqiu, Zhu Lixin, Shi Changyi, Yu Hui and Wang Gongyuan 171
A geochemical method for the exploration of kimberlite
Shao Yue and Liu Jimin 185
Earthquake prediction through the observation and measurement of mercury content variation in water
Jin Yangfen, Wu Zhonghua, Shen Chunsheng, Wei Jiazhen and Zhu Hongren 195
Application of multiparametric geochemical methods in the search for oil in the Qinggang region near Daqing Oil Field
Xie Xuejing and Yang Binzhong 203

Advances in analytical techniques in geochemical exploration
Simultaneous determination of 37 elements in geochemical samples by spectrographic method using a specially designed covered electrode
Shen Ruiping 215
The application of hydride-generation atomic fluorescence spectrometry in geochemical sample analysis
Guo Xiaowei, Zhang Jinmao, Yang Miyun and Fan Fan 237
Gold concentration from well water by the hydroelectrical extraction method
Wu Zhonghua, Jin Yangfen and Huang Hongku 247
Gold in Tuanjiegou natural waters: a method of determination by preconcentration with pretreated polyurethane foam in the field
Hou Zhihui 255
